

**DEPARTMENT OF TRANSPORTATION
FEDERAL AVIATION ADMINISTRATION
JUNEAU AIRPORT TRAFFIC CONTROL TOWER
Juneau International Airport, 1873 Shell Simmons Drive
Juneau, AK 99801**

ISSUED: Sept. 8, 2006

EFFECTIVE: Oct. 1, 2006

Juneau Airport Traffic Control Tower LETTER TO AIRMEN NO. 06-1

SUBJECT: Seasonal Reduction in Juneau ATCT Hours of Operation.

CANCELLATION: September 30, 2007

Beginning October 1, 2006, Juneau Airport Traffic Control Tower (ATCT) will begin a seasonal reduction in its hours of operation. This is a return to the hours the tower operated prior to January 2000. This change provides for better controller staffing during hours of higher air traffic volume.

The new hours and the applicable dates are:

October 1 – March 31 ----- 0700 – 2000 local

April 1 – September 30 ---- 0600 – 2300 local

During the hours the tower is closed, Juneau Automated Flight Service Station (JNU AFSS) will provide: local airport advisory service, pilot weather brief, flight planning, special VFR and IFR clearances, operation of airport lighting, and other standard AFSS services. JNU AFSS utilizes frequency 118.7 for the Common Traffic Advisory Service (CTAF) and monitors the JNU ground control frequency 121.9.

Steven D. Turner
Air Traffic Manager: Juneau Airport Traffic Control Tower
